

## **COOKING SAFETY CHECKLIST**

- Stay in the kitchen when you are frying, grilling, or broiling food. If you leave the kitchen for even a short period of time, turn off the stove.
- If you are simmering, baking, roasting, or boiling food, check it regularly, remain in the home while food is cooking, and use a timer to remind you that you're cooking.
- Keep things that can catch fire — potholders, oven mitts, paper or plastic bags, curtains — away from your stovetop.
- Wear short, close-fitting or tightly rolled sleeves when cooking. Loose clothing can dangle onto stove burners and can catch fire if it comes in contact with a gas flame or electric burner.
- Have a “kid-free zone” of at least 3 feet around the stove and areas where hot food or drink is prepared or carried.
- If you have a stove fire, when in doubt, just get out and call the fire department.
- Keep an oven mitt and lid nearby when you're cooking. If a small grease fire starts in a pan, smother the flames by sliding the lid over the pan. Turn off the burner. Do not move the pan. To keep the fire from restarting leave the lid on until the pan is completely cool.
- In case of an oven fire, turn off the heat and keep the door closed to prevent flames from burning you or your clothing. After a fire, the oven should be checked and/or serviced before being used again.
- Open micro waved food slowly, away from the face. Hot steam from a container of micro waved food or the food itself can cause burns.
- Never heat a baby bottle in a microwave oven because it heats liquids unevenly. Heat baby bottles in warm water.
- Treat a burn right away, putting it in cool water. Cool the burn for three to five minutes. Cover with a clean, dry cloth. If the burn is bigger than your fist, or if you have any questions, get medical help right away.
- Think Green! Unplug small appliances when not in use.
